Mr. Kushal Niraula
Project Supervisor

Dr. Rupak Khanal
College Chief

Acknowledgement

The success and completion of our project have been greatly influenced by the invaluable guidance and support extended to us by numerous individuals, without whom our journey would not have been possible. Foremost, we express our deep gratitude to the B.C.A (Bachelor of Computer Application) department of Science & Technology at **Gomendra Multiple College** in Birtamode for entrusting us with this project opportunity.

We are immensely thankful for the unwavering support and mentorship provided by our project supervisor from the B.C.A department, whose guidance has been instrumental in steering us towards success. Their wisdom and encouragement have been a constant source of inspiration throughout this endeavor.

Acknowledging that the success of any project is a collective effort, we extend our heartfelt appreciation to all the esteemed members of "Gomendra Multiple College" mentioned herein. Their contributions, assistance, and motivation have played a pivotal role in shaping the outcome of our project.

In particular, we extend our deepest gratitude to Mr. Kushal Niraula, our esteemed Project Supervisor, whose dedication and expertise have been instrumental in navigating us through the intricacies of this project. We are profoundly grateful for his invaluable insights and unwavering support, which have illuminated our path and enriched our learning experience immeasurably.

Introduction to project

In the digital age, Education is increasingly dynamic and interconnected, yet students and educators frequently encounter barriers to accessing high-quality, diverse, and timely academic resources. Traditional methods of note-taking and sharing—relying on physical copies, email exchanges, or fragmented digital files—can be cumbersome, inefficient, and often fail to leverage the potential of collaborative learning.

In response to these challenges, Note Sharing emerges as a transformative solution designed to streamline the exchange of academic knowledge, foster a collaborative learning environment, and enhance educational Outcomes through innovative technology.

Note Sharing aims to revolutionize the way academic resources are shared and utilized by providing an efficient, collaborative, and accessible platform. By addressing the current challenges in educational resource sharing, Note Sharing not only enhances individual learning experiences but also contributes to a more connected and supportive academic community.

Mission and Vision of project

Note Sharing is built on the core mission of democratizing education by making learning resources more accessible and shareable. Our vision is to create a global community where knowledge is freely exchanged, educational barriers are minimized, and every learner has the tools and support needed to succeed academically. We aim to bridge the gaps in traditional learning methods by leveraging digital technology to foster a seamless, collaborative, and enriching educational experience.

Note Sharing is driven by a mission to democratize education and a vision to create a globally interconnected learning community. By making educational resources more accessible, fostering collaboration, and leveraging digital technology, we are committed to transforming the way students and educators share and benefit from academic knowledge. Our mission and vision guide us in building a platform that not only addresses the current challenges in education but also anticipates and shapes the future of learning.

Features of Project

Main features of our project are outlined as follows:

1. **User Registration:** New users can create an account by providing basic information such as their name, email address, and a secure password. This process is streamlined to ensure quick and easy access to the platform.
2. **User Login:** Returning users can securely log in to their accounts using their registered email and password. This feature ensures that users can access their personalized dashboard and saved resources.
3. **Flexible Sharing:** Users have control over the visibility of their content, allowing for both open collaboration (public) and private for study .
4. **View and Edit Profile:** Users can view their profile information, including their name, email address, and profile picture. They can edit these details as needed to keep their profile current.
5. **Upload Notes:** Users can upload notes, study guides, and other educational resources in various formats (e.g., PDF, Word documents). The upload process is straightforward, allowing users to quickly share their materials.
6. **Secure Logout:** Users can securely log out of their accounts to protect their information and ensure that their session is closed when they are done using the platform.

System requirements

i) Hardware requirements:

Processor: Opt for a multi-core processor clocked at 1.8 GHz or higher to ensure smooth handling of concurrent tasks and efficient processing power.

Memory (RAM): A minimum of 8GB RAM is recommended to support seamless operation and accommodate database operations effectively.

Operating System: The application is compatible with any OS like Mac OS, Windows, and Linux etc providing flexibility and familiarity for users across various platforms.

Storage: Allocate at least 5GB of hard drive space or more to accommodate the application files and database, ensuring ample storage capacity for smooth functioning.

Peripheral Devices: Ensure availability of necessary and basic peripheral devices such as keyboard, mouse, and display to facilitate user interaction and system operation effectively.

ii) Software requirements:

For software requirement there must be compatible software installed in the PC to conduct the program successfully. Different program requires different software installed to run according to the platform in which the developers have developed it.

- ❖ Any Operating System supports the application.
- ❖ Compiler: Visual Studio
- ❖ MySql Database

Visual Studio: Visual Studio is an Integrated Development Environment(IDE) developed by Microsoft to develop Desktop applications, GUI(Graphical User Interface), console, web applications, mobile applications, cloud, and web services, etc. With the help of this IDE, you can create managed code as well as native code.

MySQL Database: Employ MySQL, a robust relational database management system, to efficiently store and manage application data, ensuring reliability and scalability as your project grows.

Tech Stack:

let's break down out tech stack into frontend, backend, and database components:

Frontend:

→ React.js

Backend:

→ Php framework(Laravel)

Database:

→ MySQL

Additional Tools:

→ Bootstrap CSS

→ React Router

Development Environment:

→ Text Editor: Visual Studio Code & WebStorm (React.js)

→ Version Control: Git , Git Bash , GitHub

→ Package Management: npm (Node Package Manager)

Website Snapshot

1.a Login

The screenshot shows a web browser window with the address bar displaying 'localhost:3000/Login'. The page title is 'Notes Sharing'. In the top right corner, there are links for 'Login' and 'Register'. The main content area features a 'Login' form with the following fields: 'Email address:' with a text input containing 'Email', 'Password:' with a text input containing 'Password', and a checkbox labeled 'Remember me'. A green 'Submit' button is located at the bottom of the form. The Windows taskbar at the bottom shows the search bar, task view button, and several application icons. The system tray on the right indicates a temperature of 86°F and the date/time as 7:12 AM on 6/7/2024.

Conclusion

In conclusion, Note Sharing aims to revolutionize the way academic resources are shared and utilized by providing an efficient, collaborative, and accessible platform. By addressing the current challenges in educational resource sharing, Note Sharing not only enhances individual learning experiences but also contributes to a more connected and supportive academic community.
